**INTERIOR DESIGN
PORTFOLIO**

Hello!

Welcome to my interior design portfolio! My design philosophy is rooted in the belief that a well-designed space should look inspiring and elevate the daily experiences of those who inhabit it. Throughout my work, you'll find an emphasis on clean lines, thoughtful material choices, and a tailored approach to each client's unique needs. These designs offer a glimpse into my creative vision and the versatility I bring to every project.

NEXT Law Office

Fall 2025
Studio V
Square Footage: 15,200
Location: Los Angeles, CA
Software: Revit, Enscape, Photoshop

Project Brief

Individual

This project explores the design of a contemporary law firm workplace centered on comfort, adaptability, and employee well-being. The space is designed to function as a supportive environment rather than a rigid office, balancing focused work areas with collaborative and restorative zones. Emphasis is placed on flexibility, intuitive circulation, and material warmth to encourage productivity while reducing stress. The overall goal is to create a workplace that feels familiar, human-scaled, and responsive to the evolving needs of its users.

Reception

Curves in Brand Connection & approachability
Boxed Wood pattern Framework and order repetition

Soft, irregular curves contrast with the clean, structured lettering.

Natural textures reflect balance and convey a sense of growth, connection, and stability that mirrors the firm's identity.

“Rooted in law, driven by legacy”

- 1 Reception
- 2 Large Conference
- 3 Work Cafe
- 4 Town Hall
- 5 Hearth Room
- 6 Workstations
- 7 Partner Offices
- 8 Small Group Meeting
- 9 Manager Partner

Work Cafe

Key Design Strategies

Access to natural daylight and integrated greenery help reduce stress and supports overall well-being

Flexible seating supports accessibility and inclusivity across age groups and abilities, offering options for both independent work and social interaction.

Design Intent

The work café offers a relaxed, communal setting where employees can connect, recharge, and step away from their desks. Designed to support both casual interaction and focused moments, the space blends comfort with functionality to encourage well-being and informal collaboration throughout the day.

Hearth Room

Key Design Strategies

Natural daylight and integrated shading strategies reduce energy consumption while supporting visual comfort.

Warm, tactile materials and soft fabrics are used to promote comfort and support mental well-being.

Design Intent

The hearth room serves as an informal gathering space where employees can meet casually or engage in spontaneous conversations. Inspired by the feeling of home, the design emphasizes warmth and comfort, creating a grounded environment that supports connection within the workplace.

Town Hall

Key Design Strategies

Brand identity is integrated into acoustic design elements, enhancing both sound control and visual cohesion.

Modular furniture allows the space to adapt to different meeting formats and functional needs.

Design Intent

The town hall supports larger company gatherings, presentations, and shared updates while remaining flexible for everyday use. Stackable seating and adaptable furnishings allow the space to transition easily between all-hands meetings and smaller group work settings.

Design Intent

The large conference room is positioned as a primary workspace and a key first impression within the office. Warm tones and wood ceiling elements create a welcoming atmosphere while adding a sense of sophistication, balancing comfort with professionalism for focused meetings and collaboration.

Key Design Strategies

Textured glass provides visual privacy during meetings while maintaining transparency and connection to adjacent spaces.

Integrated, accessible technology within the conference table and large display screens support in-person collaboration and virtual meetings with ease and flexibility.

Large Conference

Design Intent

The workstation area is designed as a focused, high-concentration zone that prioritizes privacy within the law office. Taller partitions create visual separation while still allowing natural light to filter in from adjacent private offices. Soft, indirect lighting and a restrained material palette help maintain a calm environment without harsh contrasts or distractions.

Key Design Strategies

Taller workstation partitions increase visual and acoustic privacy, supporting focused, individual work.

Natural colors, including greens and warm wood textures, are used to promote calm and reduce visual stress within the workspace.

Workstations

Design Intent

The managing partner's office reflects the core design language carried throughout the workplace, reinforcing leadership, professionalism, and approachability. Warm wood tones, natural daylight, and privacy glazing create a space that feels both welcoming and authoritative, supporting confidence, focus, and meaningful interaction between leadership and staff.

Key Design Strategies

Custom wall art reinforces brand identity and reflects the values and strength of the firm.

Natural daylight paired with privacy glazing creates an inviting, comfortable environment that encourages open communication and approachability.

Hermes Airport Lounge

Fall 2024
Studio III
Square Footage: 12,300
Location: Minneapolis, MN
Software: Revit, Enscape, Photoshop

Project Brief

Partner

This airport lounge seamlessly blends Hermès' timeless luxury with a dynamic travel experience. Inspired by the brand's equestrian heritage and the energy of airports, the design mirrors the fluidity of Hermès scarves, with the signature orange guiding guests through the space. Equestrian elements enhance the sense of motion and elegance, creating a refined yet dynamic atmosphere.

HERMÈS
PARIS

Travel as a pause, not an
interruption

“Authenticity over glamour”

- 1 Reception
- 2 Hermès Store
- 3 Cafe
- 4 Bar
- 5 Lounge
- 6 Focus Area

Design Intent

The bar is designed as a luxurious social hub within the lounge, transforming the airport experience into a refined moment of pause. Marble surfaces, backlit detailing, and warm wood accents reflect Hermès’ craftsmanship and heritage, while a gold chain motif references the brand’s iconic hardware. Together, these elements create a gourmet destination that feels elevated, intimate, and distinctly Hermès.

Key Design Strategies

Soft, layered lighting, including a backlit bar and intimate table lamps, reflects Hermès’ preference for understated elegance over overt glamour, creating a refined atmosphere that feels exclusive without being visually loud.

Bar

Design Intent

The dining area is designed to offer travelers a relaxed, elevated sit-down experience, particularly for those with longer layovers who can take time to enjoy a full meal. A mix of large booth seating and varied table arrangements allows for variety while maintaining comfort and intimacy. These layered design elements allow brand identity to be expressed through subtle, intentional details.

Key Design Strategies

Inspired by Hermès’ equestrian heritage, leather textures are incorporated into the cushions and booths to reflect the craftsmanship of the Hermès saddle and leather products.

Dining

Design Intent

The lounge is designed as a transitional space that bridges the energy of the dining and bar areas with moments of rest and relaxation before travelers continue their journey. A variety of seating zones allows guests to choose how they engage with the space. Oversized, comfortable furnishings create an intentional sense of ease, while integrated private nooks support informal meetings and focused work within a calm, refined environment.

Key Design Strategies

Wood partition elements define seating zones and provide acoustic separation, supporting a quieter lounge experience while reflecting the brand’s emphasis on craftsmanship, material integrity, and understated luxury.

Mid-Century Manor

Spring 2024

Studio II
Square Footage: 450

Location: New Jersey
Software: Revit, Enscape, Photoshop

Project Brief
Individual

The design blends 1960s-inspired details with a modern touch, featuring wood cabinetry and casework in the kitchen. A terrazzo countertop influenced the color palette, incorporating deep turquoise, muted green, and light pinks, which are echoed in the barstools and backsplash. The bathroom continues this theme with mosaic tile on the flooring and tub wall, creating a cohesive, stylish update.

Kitchen FF&E

Bathroom FF&E

Designed to support busy mornings, frequent home cooking, and shared family meals, the kitchen prioritizes efficiency without increasing square footage. Built-in appliances, space-saving storage, and a central island with bar seating allow the family to gather comfortably while maintaining clear circulation for daily routines.

Kitchen

The bathroom is designed to accommodate a blended family's shared daily use through durable finishes, easy-access storage, and dual sinks. Separating the toilet from the main area allows multiple users to share the space comfortably while supporting both efficiency and relaxation.

Bathroom
